

Chimiquement citronné is the meeting of two peoples: the POPIen.nes who work in the jewelry making studio of the Ensad Limoges and The curieuses who discover this *terra incognita*.
"Seeing through the eyes of people for whom the studio is unknown made me perceive the space where I work from a different angle. I think this exposition will kind of give the same feeling to the spectators. A studio loaded with an imaginary spark, stories and feelings" a POPienne tells us.
Chimiquement citronné was developed during the ARCArtificium, it gives to see with malice and singularity the works thought and produced within POPatelier BIJOU.
